

## WHAT IS INTERNATIONAL ISO CERTIFICATION?

Today, more and more Ukrainian companies are entering foreign markets.

To do this, you need to pass a quality management system (QMS) and obtain an ISO certificate.

**Certification ISO** – it is a series of certain regulations aimed at controlling the management activities of the company, including document management, facilities, resources and other production processes.

The presence of an ISO certificate ensures that all goods and services that have passed the certification procedure fully comply with accepted ISO standards.

### ECONOMIC EFFECT OF GETTING A CERTIFICATE ISO:

1. Opportunity to enter international markets, where the presence of a certificate is a must.
2. Opportunity to work in the sector regulated by the government of the country where your product is presented (admission to work with government organizations).
3. Admission to tenders in which ISO certification is a mandatory requirement.
4. Work with large retail chains around the world.

### TYPES OF (MAIN) CERTIFICATIONS ISO:

#### ISO 9001 - QUALITY MANAGEMENT SYSTEMS

The most common and important standard that sets the criteria for a quality management and management system of any enterprise that manufactures or sells, transports any product or provides any service to the public.

#### ISO 13485 - MEDICAL PRODUCTS

Safety and quality are "undiscussed issues" in the field of medical devices. Helps companies organize quality management processes and ensure the production of quality medical products.

#### ISO 22000 - FOOD SAFETY MANAGEMENT SYSTEMS

Help the company prevent food contamination

#### ISO 14000 - ENVIRONMENTAL MANAGEMENT

Helps the company reduce its impact on the environment, reduce waste and follow the path of modern development

#### ISO 45000 - OCCUPATIONAL HEALTH AND SAFETY

Helps the company reduce the number of accidents at work.

### HOW TO GET A CERTIFICATE?

To obtain an ISO certificate, the following documents are submitted to the body:

- ❖ standard application;
- ❖ constituent and statutory documentation;
- ❖ documents on the right of ownership or lease of industrial premises;
- ❖ technical documentation for products / service schemes;
- ❖ schematic representation of the company's divisions.

Depending on the type of activity of the enterprise, the list of documents may change.
